The book is available at <http://riotousretirement.com> and will also be available shortly at the local, more discriminating, bookshops.

Riotous Retirement

Brian Robertson and Ron Smallwood both retired Queenslanders have just written the book *Riotous Retirement*, published by Agneau Press Ipswich.

Brian poses the question, “Is moving to a retirement village a good idea?” and then goes on to give this advice.

“If living in a quiet and peaceful environment where friendship with those of similar age and attitude is your main goal then it is compulsory that you first read this book—RIOTOUS RETIREMENT.”

Ron then explains more about the book, “This book does not describe the accord and tranquility of retirement. It documents and celebrates the odd, the bizarre, the eccentric and the downright peculiarity of over 55 year olds who are always convinced that they are right and everyone else is wrong. What makes you think that a group of such eccentrics living in close proximity will result in harmony?”

While harmonious living may well be considered dull, the stories in this book suggest strongly that life in Burnside retirement village is at least a lot more interesting!

Brian believes that this book is probably closer to the reality, which is retirement village living, or village resort living, than all the sales leaflets and brochures promoting this lifestyle.

Both authors recommend the book for everyone but especially for those over 50 years if they are making important life choices such as—“Where shall we live!”
